## PROFILE

### ABOUT ME

A proactive and highly coachable individual with a strong drive for efficiency and excellence. Passionate about learning and adapting to new challenges, I thrive in fast-paced environments where deadlines matter. With a determined mindset, I ensure that tasks are completed on time, no matter the challenge. Always open to feedback and eager to grow, I am committed to delivering high-quality results while continuously improving my skills.

### PROJECTS

#### • ORGGLOW

OrgGlow is a website dedicated to promoting beauty and skincare products made from organic materials. As part of the project, I contributed to the front-end development of the website, ensuring an engaging user experience, while also taking responsibility for the documentation to maintain clear project records.

#### • HUBSPOT-COFFEE

Hubspot-Coffee is a website for a local coffee shop near Holy Angel University that offers a variety of coffee blends and fruit beverages. In this project, I mainly focused on the CSS to create a visually appealing and responsive design while also contributing to the overall documentation of the site's development.

#### • CODEGEEKS

Codegeeks.site is an internal project for our department's organization, where we developed a website to represent the group. I took the lead in working on the CSS for the site to ensure an attractive and functional design, and I also helped with the documentation to ensure the project details were clearly outlined.
